Summary

Full-stack developer and founder of Wreny. Background as CTO: owning product and engineering from idea through production. Strong on modern web stacks, shipping end-to-end, and using AI tools to move faster without sacrificing quality.

Experience

Cursor Community

Community Ambassador

February 2026 - Present

Kigali City, Rwanda

🌐 <http://cursor.com/community>

- Host in-person community events (e.g. **Cafe Cursor Kigali**) for local developers to try Cursor, share workflows, and troubleshoot real projects.
- Represent Cursor in the Kigali builder community and connect attendees with cursor.com/community resources.
- Help developers adopt AI-assisted development and debugging patterns responsibly in day-to-day shipping.
- Collect structured product feedback from events and share it with Cursor's community team.

Wreny

Founder

February 2025 - Present

🌐 <https://wreny.app>

- Own product and engineering for a web app focused on **resume and cover letter creation** with **AI-assisted editing and export**.
- Define pricing and packaging (e.g. free vs paid around **PDF export** and **cover letter** features).
- Ship and operate the full stack: auth, billing, app UX, and production releases.

Dime Inc Ltd

Chief Technology Officer

December 2024 - Present

Kigali, Kigali City, Rwanda

🌐 <https://dime.rw>

- Lead delivery for **client projects** across **mobile apps**, **e-commerce sites**, and **internal management tools**.
- Architect and oversee implementation, deployment, and handover so client teams can run systems day to day.
- Built an **education marking platform**: students get **structured feedback** on submissions; teachers **grade faster** with workflows that surface **class-level insight** (who's struggling, where gaps are).

Kayko

Software Developer

November 2024 - December 2024

Kigali City, Rwanda

🌐 <https://kayko.rw>

- Extended and maintained **internal tools** used by the team for day-to-day operations.
- Implemented features end to end: requirements, implementation, tests where applicable, and release.
- Collaborated with stakeholders to prioritize fixes and small product improvements on tight timelines.

Education

Software Development

High School Diploma

Skills

Web Technologies

HTML5, JavaScript, TypeScript, Tauri, Tailwind

Web Frameworks

React.js, Vite, Next.js, Tanstack, Laravel

Backend

Express, Hono, Bun, PostgreSQL, MySQL, MongoDB, Convex, Supabase
